

# COLLEGE NEWS PORTAL

Mr. G SREENIVASULU<sup>1</sup>, DABBUGUNTA LAVANYA<sup>2</sup>

<sup>1</sup>Assistant Professor, Dept of MCA, Audisankara College of Engineering and Technology (AUTONOMOUS), NH-5 Bypass Road, Gudur, Tirupati – 524101.

<sup>2</sup>PG Scholar, Dept of MCA, Audisankara College of Engineering and Technology (AUTONOMOUS), NH-5 Bypass Road, Gudur, Tirupati – 524101.

**ABSTRACT**—Now a days, building a news portal college purpose is very important to share the college information. In current system, college events and educational information have been share through notice board only. This is not a effective to communicate the students. In this project, we develop a website in which we publish college events and educational information as an articles. And this system send the email notifications to all student who register to the website to get the latest news updates. And this system allows all the students write the articles of their own.

Index terms— Post articles, News, College.

## I. INTRODUCTION

College news portal allows students to read up to date news related to many fields like entertainment, education etc. without any payment or login. New News can be added only by the admin and only admin have the right to update or delete any News.

Admin have the right to give authority to other for news update, add or Delete. And this system sends the email notifications to all students who register to the website to get the latest news updates. And this system allows all the students write the articles of their own.

## What is News Portal?

News Portal is an online communication medium for internet users which are read all over the world. ... The news portal development allows to publish publications, press releases, columns, articles, blogs and other news related content.

A news portal is an access point to news. This is generally thought of as a Internet connection to a news source but the definition of a “Portal” would include a newspaper, magazine or any other access to news. A web portal is any access point to the Internet.

## Column

A column is a recurring piece or article in a newspaper, magazine or other publication, where a writer expresses their own opinion in few columns allotted to them by the newspaper organisation. Columns are written by columnists.

A website development that will serve news portal requirements, will actually be the online presence of a newspaper, a magazine or a channel that cover the local, national or global range. By using this package you will be able to upload news and authors' posts about politics, economics, culture, sports, the environment and enjoy having visitors from all over the world.

News Portal is the ultimate magazine theme with creative design and powerful features that allow you to quickly and easily create a style to suit your needs.

It is completely built on Customizer which allows you to customize most of the theme settings easily with live previews.

## II. LITERATURE SURVEY

Today a growing number of people rely on the Internet as their primary source of information, especially news. Most broadcasting companies have their own web

sites and update them with new information as soon as it becomes available. It has also become evident that such vast amount of information is often too much for people to sift through in order to get to that one news they are interested in. Major news portal such as Exite.com or Yahoo.com significantly alternative the problem. Centraltimes.in is a new but ambitious magazine publishing and distribution company that will be based in Nagpur but having its audience in central India. Our niche as a news portal company covers News, Entertainment, Business and Sport. Our state of the art in – house reviewers are located in a standard corner piece facility that is centrally located in the heart of India. “Centraltimes.in” is a complete Web-Application for publishers who wants to drive an online newspaper. All content stored in database and divided into categories. Categories can be easily modified to browse and contains a self-organized interface to promote top-stories. Software can be managed with a rolebased system similar like a real newspaper. Page editors, managers and Assistance etc, focus of role-based system to drive applications in secure mode. Content schedule feature helps you to publish articles and news at earlier time. Media News Portal create all articles and publish them within search engine friendly URL.

## Customised news portal design

Online news portal development should provide readers with the possibility to customize their home page giving them the power to choose sections, contents, topics of their interest.

## III. PROPOSED SYSTEM

The overview of our proposed system is shown in the below figure.

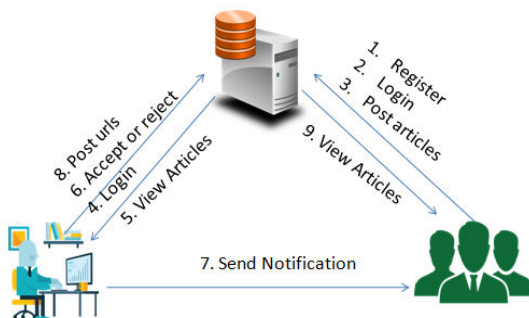

Fig. 1: System Architecture

### Implementation Modules

#### Admin Module

In this module, admin has the full control on the system. He login to the system and performs operations like view articles, accept or reject the articles, post urls, and for privacy he change password.

#### Search Module

- In this module, the member search the articles based on articles description.

- The future very much useful to find the old articles.

#### Member module

In this module, all other users in the college considered as members of the system. They register as member of the system. When registration complete he receive OTP for validate the email of the member. After validate OTP, then only the member login to the system using valid email and password.

After he login he perform operations like, post articles, view articles, receiving notification about articles, for privacy he change his password.

#### Email Notification

- In this module, when the admin accepts the articles each and every member of the system receive the new article update.
- This will be very useful to find the update information in portal.

## IV. RESULTS

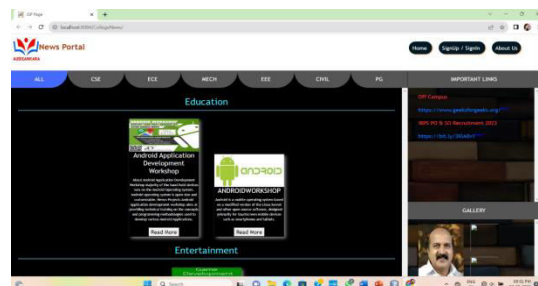

Fig. 2: Home Page

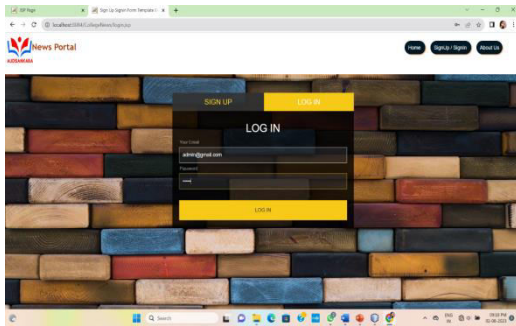

Fig. 3: Login Page

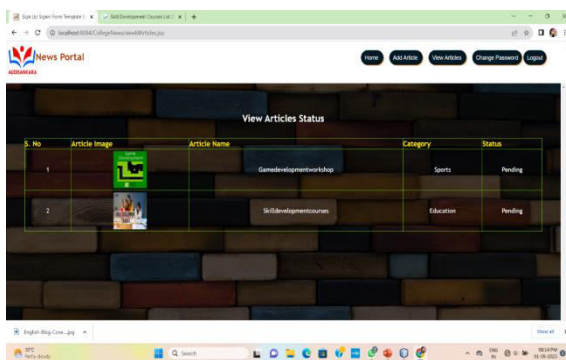

Fig. 4: View Articles

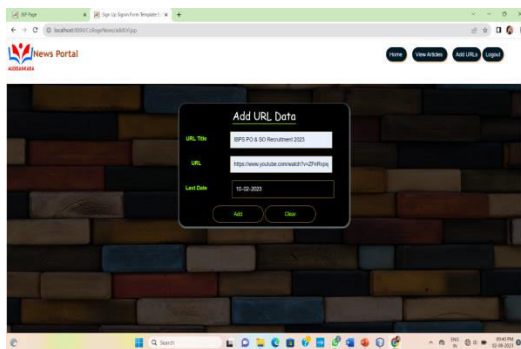

Fig. 5: Upload URLs.

## V. CONCLUSION

In this project, we develop the beautiful website to present the college news. News portal designs which are easy to navigate are more likely to be visited by readers than those without it. The navigation menu should be

simple and in the right position. In news portal development, readability is the most important feature. It provides the flexible access and details efficiently.
